

Contents

1	Introduction	1
1.1	The Willmore flow	4
1.2	Surface blending and surface restoration	8
1.3	The anisotropic Willmore flow	10
1.4	Surface matching	13
2	Foundations	17
2.1	Some geometric analysis	17
2.2	The concept of anisotropy	23
2.3	General gradient flows	30
2.4	Finite Element space discretization	32
2.4.1	Variations of the mass and stiffness matrix	37
3	Review of the anisotropic Willmore flow for surfaces	41
3.1	First variation of the anisotropic Willmore functional	41
3.2	Boundary value problem for the anisotropic Willmore flow	45
3.3	Semi-implicit space discretization scheme	48
3.4	Numerical results	56
4	Natural time discretization for isotropic Willmore flow	59
4.1	Natural time discretization for gradient flows	60
4.2	Derivation of the two step time discretization	64
4.2.1	Variational time discretization of mean curvature motion	64
4.2.2	Two step time discretization for the isotropic Willmore flow	66
4.3	Finite Element space discretization	68
4.4	Numerical solution of the optimization problem	70

4.5	Numerical results	78
4.5.1	Elastic flow for curves	78
4.5.2	Willmore flow for surfaces	84
5	Surface restoration via two step time discrete Willmore flow	93
5.1	Boundary value problem for the isotropic Willmore flow	95
5.2	Finite Element space discretization	101
5.3	Numerical solution of the optimization problem	104
5.4	Numerical results	106
6	Natural time discretization for anisotropic Willmore flow	117
6.1	Derivation of the two step time discretization	117
6.2	Finite Element space discretization	120
6.3	Numerical solution of the anisotropic optimization problem	123
6.4	Anisotropic elastic flow of parametrized curves	127
6.4.1	Finite element space discretization	127
6.4.2	Numerical results	131
6.5	Remark on the anisotropic Willmore flow for surfaces	134
7	Variational methods for surface matching	137
7.1	Variational model	140
7.1.1	Measuring distortion via a deformation	140
7.1.2	Measuring bending via a deformation	142
7.1.3	Matching features	143
7.2	Existence of an optimal surface matching	144
7.3	Fully practical approximation	157
7.3.1	Γ -convergence of the approximated surface matching energy	159
7.4	Some applications revisited	166
	Bibliography	167
