

List of Contents

I. Introduction and Motivation	1
I.1 Introduction and Motivation	1
I.2 The Main Claims	12
II. ‘Fundamental’ Time Asymmetries	17
II.1 Preliminary Considerations	21
II.2 A Proper Notion of ‘Fundamental’ Time Asymmetries	22
II.3 Conclusion	25
III. Time’s Arrow in Cosmology	29
III.1 Different Views	33
III.1.1 The Time Symmetric View	33
III.1.2 Entropy-Based Approaches	35
III.1.3 Hyperbolic Curved Spacetimes	39
III.2 On a Fundamental Time’s Arrow	41
III.2.1 A New Approach.....	41
III.2.2 Crucial Conditions	42
III.2.3 Symmetric Spacetimes	43
III.2.4 Solution Set	47
III.2.5 The CPT Objection	48
III.2.6. Advantages of the Proposed Non-Entropic Arrow of Time in Classical Cosmology ----	52
III.3 Summery and Conclusion	54
Digression III.A: Conceptual Priority of a Non-Entropic Arrow of Time in Classical Cosmology -	58

Digression III.B: On Time Reversal Invariant Equations	61
--	----

IV. The Arrow of Radiation-----63

IV.1 Time-Reversal Invariance and the Arrow of Radiation	67
--	----

IV.1.1 The Arrow of Radiation, Time Directed Causation and the Theoretical Symmetry of Classical Electrodynamics	68
--	----

IV.2 On the Retardation Condition -	76
---	----

IV.3 On the Time Symmetric View from Price (1996) and (2006) ---	78
--	----

IV.3.1 On Price (1996)-----	78
-----------------------------	----

IV.3.2 On the Arrow of Radiation as a By-Product of Classical Thermodynamics; Price (2006) -	80
--	----

IV.4 Boundary Conditions for the Arrow of Radiation	82
---	----

IV.5 On The Arrow of Radiation and Time Asymmetric Spacetimes	84
---	----

IV.6 Summary	88
--------------------	----

Digression IV.A Implications from the Night Sky?	93
--	----

Digression IV.B On the Reinterpretation of the Absorber Theory	96
--	----

Digression IV.C Thermodynamics and the Time Asymmetry in Wave Mechanics	103
---	-----

Digression IV.D The Sommerfeld Condition	106
--	-----

V. Time Asymmetries in Quantum Cosmology, Entropy and the Second Law of (Quantum) Thermodynamics-----114

V.1 Introductory Thoughts	117
---------------------------------	-----

V.2 On the Traditional Understanding of the Thermodynamic Asymmetry	118
---	-----

V.2.1 Allahverdyan and Gurzadyan; The Abstract Setup	118
--	-----

V.2.2 An Epistemic Time Arrow	124
-------------------------------------	-----

V.2.3 The DWM Explication-----	127
--------------------------------	-----

V.3 On an Physical Time Arrow in Thermodynamics	133
---	-----

V.3.1 On the Arrow of Time in Quantum Cosmology	133
V.3.2 On the Quantum Cosmological Model	134
V.3.3 On Time Asymmetric Behaviours of the Particle Number Operator	138
V.3.4. On the Thermodynamic Time Arrow	150
V.4 Summary of the Main Conclusions	154

VI. Time Arrows in Ordinary Quantum Mechanics-----159

VI.1 Brief Introductory Thoughts	162
VI.2 On the Motivation of the Arguments	163
VI.3 The Arrow of Time in Laboratory Descriptions	164
VI.4 A Time Asymmetries in Ordinary Quantum Mechanics and the Rigged Hilbert Space Approach	166
VI.5 A Time Arrow in the Decoherence Effects	169
VI.5.1 From Quantum Systems to Classical Ensembles; Decoherence	170
VI.5.2 The Measurement	172
VI.6 Conclusion	174

VII. Summary of the Main Conclusions-----178

VII.1 Results, Motivations and Arguments	178
VII.1.1 'Fundamental' Time Asymmetries (Chapter II)	178
VII.1.2 Time Asymmetries in Cosmology (Chapter III)	180
VII.1.3 The Arrow of Radiation (Chapter IV)	183
VII.1.4 Time Asymmetries in Quantum Cosmology, Entropy and the Second Law of (Quantum) Thermodynamics (Chapter V)	186
VII.1.5 Time Arrows in Ordinary Quantum Mechanics (Chapter VI)	189
VII.2 Summery and Motivation for Further Investigations	192
