

Table of Contents

Chapter 1: Introduction	1
1 Motivation and research objective	1
2 State-of-the-art methodologies to derive spatially explicit agricultural data.....	2
2.1 Remote sensing based land cover observations	3
2.2 Spatial allocation procedures based on expert data	5
2.3 Disaggregation procedures using sample data.....	6
3 Conclusions.....	7
4 References.....	10
Chapter 2: Computation of a European agricultural land use map – statistical approach and validation	13
1 Introduction.....	13
2 Database and definition of Homogeneous Spatial Mapping Units	15
2.1 Maps of natural location factors	15
2.2 CORINE Land Cover Map	16
2.3 Motivation and construction of Homogeneous Spatial Mapping Units...17	
2.4 Land Use/Cover Area Frame Statistical Survey (LUCAS)	17
3 Disaggregation procedure	17
3.1 Locally weighted binomial logit estimation	18
3.2 Binomial versus multinomial regression	19
3.3 Single crops versus groups of crops	20
3.4 Local versus global regressions	20
3.5 Attaining variance of land use shares	21
3.6 Consistent disaggregation.....	22
4 Results and validation	23
5 Conclusion	30
6 References.....	29
7 Appendix: Note on clustering of STUs for HSMU analysis.....	30

Chapter 3: Spatial allocation of farming systems and farming indicators in Europe	35
1 Introduction	35
2 Data	37
2.1 Farm data.....	37
2.2 Spatial information.....	38
2.3 Land use	38
2.4 Yield.....	38
2.5 Less favoured area and altitude zone	39
3 Methodology	39
3.1 Overview	39
3.2 Definition of Farm Mapping Units (FMU)	40
3.3 The constrained optimization model	41
3.4 LFA and altitude zone	41
3.5 Yield.....	42
3.6 Land use	43
3.7 Validation.....	44
3.8 Processing of allocation results for further use	45
4 Results and Discussion.....	46
4.1 Model comparison.....	46
4.2 Detailed validation in Netherlands	48
4.3 Allocation results.....	51
4.4 Allocation of farm types according to farm size	51
4.5 Allocation of farm types according to farm intensity.....	53
4.6 Allocation of farm types according to farm specialisation.....	53
5 Conclusion.....	54
6 Acknowledgements	55
7 References	55

Chapter 4: Economic and environmental impacts of milk quota reform in Europe	57
1 Introduction.....	57
2 Modelling Framework	58
2.1 The CAPRI model	58
2.2 Marginal cost and quota rents.....	60
2.3 Econometric estimation	61
2.4 Linking the marginal cost estimation to CAPRI.....	63
3 Scenario Design	65
3.1 Baseline scenario	65
3.2 Milk quota reform scenario	66
4 Impacts of Milk Quota Reform.....	66
4.1 Milk supply and dairy herds	66
4.2 Beef and cattle herds.....	69
4.3 Other animal herds.....	71
4.4 Land use changes	71
4.5 Agricultural Income.....	72
4.6 Environmental effects.....	73
5 Sensitivity Analysis	76
5.1 Elasticity of milk supply.....	76
5.2 Quota rents.....	77
6 Conclusions.....	78
7 Acknowledgements.....	80
8 References.....	80
