

Table of Contents

List of Figures	III
List of Tables.....	III
General Introduction.....	1
Chapter 1 Development of a building-specific air ventilation model for estimations of methane and ammonia emissions from a naturally ventilated dairy barn in spring	13
1.1 Introduction.....	15
1.2 Material and Methods	17
1.2.1 Site description and production	17
1.2.2 General procedures	19
1.2.3 Measurement of ventilation rates	19
1.2.4 Measurement of gas concentrations	20
1.2.5 Calculation of emissions.....	21
1.2.6 Measurement of weather parameters	21
1.3 Results.....	22
1.3.1 Model for the calculation of the ventilation rate	22
1.3.2 Ventilation rate	24
1.3.3 Gas concentrations and emissions	24
1.4 Discussion.....	27
1.5 Conclusions.....	29
1.6 Acknowledgements.....	30
1.7 References.....	31

Chapter 2 Effect of manure removal and storage management on methane and ammonia emissions from a naturally ventilated dairy barn.....	34
2.1 Introduction.....	36
2.2 Material and Methods	38
2.2.1 Procedures	38
2.2.2 Description of measurement procedures	40
2.2.3 Description of modeling procedure	43
2.3 Results.....	45
2.4 Discussion	49
2.5 Conclusions.....	51
2.6 Acknowledgements.....	52
2.7 References.....	53
Chapter 3 A comparison of emission calculations using different modeled indicators with 1-year online measurements.....	57
3.1 Introduction.....	58
3.2 Material and methods.....	61
3.2.1 Model concept of DAIRYDYN.....	61
3.2.2 Measurement installation on Haus Riswick	64
3.3 Results.....	68
3.4 Discussion	72
3.5 Conclusion	74
3.6 Acknowledgments	76
3.7 References.....	77
General Conclusions.....	80
