Table of contents

List of Acronyms and Abbreviations 8
Acknowledgments 9
1. Introduction 10
1.1 Role of afforestation on marginal irrigated croplands 10
1.2 Motivation of the study 13
1.3 Objectives, research questions and hypothesis 14
1.3.1 Objectives of the study 14
1.3.2 Research questions 14
1.3.3 Hypothesis 15
1.4 Conceptual framework 15
1.5 Structure of the thesis 17
2. Background of the study area 18
2.1 Geographical characteristics of the study area 18
2.2 Agricultural production 19
2.2.1 Marginal croplands 20
2.2.2 Irrigation water and crop yield response 22
2.2.3 Variability in crop yields and prices 25
2.3 Bimodal agricultural system 26
2.3.1 Commercial farms 27
2.3.2 Rural households 28
2.4 Agricultural policies in Uzbekistan 30
2.4.1 Procurement policy 30
2.4.2 Land tenure 31
2.5 Afforestation of marginal croplands 32
2.5.1 Establishing tree plantations on marginal croplands 32
2.5.2 Tree products 33
2.5.3 Clean Development Mechanism Afforestation and Reforestation 35
3. Costs and benefits of afforestation on marginal croplands 36
5.3 Results on organization of rural households
5.3.1 Classification of rural households
5.3.2 Typology of agricultural contracts
5.4 Results on impact of introducing farm forestry on rural livelihoods
5.4.1 Land use pattern
5.4.2 Farm employment and rural payments
5.4.3 Profits of farm and utility of rural households
5.4.4 Energy use and CO$_2$ emission reduction of rural households
5.4.5 Livestock feeding rations
6. Discussion and Conclusions
6.1 Carbon value of tree plantations
6.2 Co-benefits of non-timber products
6.3 Afforestation on marginal farmland as a risk managing strategy
6.4 Afforestation and rural livelihoods
6.5 Policy implications
6.6 Further research
