## Contents

1 Introduction  
2 Heterotic orbifolds  

### 2 Heterotic orbifolds

2.1 The Heterotic String  
2.2 Compactifications to four dimensions  

#### 2.2.1 Orbifolds  
2.3 Strings on orbifolds  

#### 2.3.1 Gauge embeddings  
#### 2.3.2 Twisted vacua and space group invariant states  
#### 2.3.3 Massless Spectrum  
3 Discrete symmetries in orbifold models  

### 3 Discrete symmetries in orbifold models

3.1 Physical Vertices and Correlation Functions  

#### 3.1.1 Gauge invariance  
#### 3.1.2 Discrete symmetries from the space group  
#### 3.1.3 Non-Abelian family symmetries  
#### 3.1.4 H-momentum conservation  
3.2 Discrete $R$-symmetries from orbifold isometries  

#### 3.2.1 Further $R$-symmetry candidates  
3.3 Universal discrete anomalies  

#### 3.3.1 An explicit example  
4 An extension of the heterotic mini-landscape  

### 4 An extension of the heterotic mini-landscape

4.1 The particle Zip-code in mini-landscape models  

#### 4.1.1 The Higgs system  
#### 4.1.2 The top-quark  
#### 4.1.3 The first two families of quarks and leptons  
#### 4.1.4 The pattern of supersymmetry breakdown  
4.2 The $Z_2 \times Z_4$ orbifold  

#### 4.2.1 Gauge embeddings  
#### 4.2.2 Discrete symmetries
