

Contents

1	Introduction and overview of the thesis	1
1.1	Research objective and structure of the thesis	4
1.1.1	Research questions	5
1.1.2	Structure	6
1.2	Data and methodologies	7
1.2.1	Data sources	7
1.2.2	Methodologies	8
1.3	Summary of main findings	9
1.4	Conclusions and outlook	14
1.5	References	19
2	What Does Granger Causality Prove? A Critical Examination of the Interpretation of Granger Causality Results on Price Effects of Index Trading in Agricultural Commodity Markets	24
2.1	Introduction	25
2.2	Data and Methodology	26
2.2.1	CFTC reports on index trading activity	27
2.2.2	Granger Causality tests	28
2.3	Review of Empirical Studies	30
2.3.1	Model description	34
2.3.2	Individual variable specifications	35
2.3.3	Synthesis of results	36
2.4	Interpretability and Explanatory Power of GC Test Results . .	41
2.4.1	Robustness of <i>prima facie</i> causality given <i>Activity</i> variable specification	42
2.4.2	Consequences from market efficiency with respect to existing information	43
2.4.3	Consequences from market efficiency with respect to forecast information	45
2.5	Conclusion	47
2.6	References	49
2.7	Annex	55

3	Directional Volatility Spillovers between Agricultural, Crude Oil, Real Estate and other Financial Markets	68
3.1	Introduction	69
3.2	Previous empirical results on market linkages	70
3.2.1	Agricultural-energy market linkages	71
3.2.2	(Agricultural) commodity-financial market linkages	72
3.3	Description of the methodology and data	74
3.3.1	Data	74
3.3.2	Generalized forecast error variance decompositions	75
3.3.3	Volatility spillover indices	76
3.4	Empirical results	76
3.4.1	Development of volatilities, prices and trading volumes	78
3.4.2	Rolling VAR estimation and spillover index calculation	78
3.4.3	Volatility spillover indices	80
3.4.4	Discussion of results	86
3.5	Conclusions	90
3.6	References	93
3.7	Annex	96
4	Price dynamics and financialization effects in corn futures markets with heterogeneous traders	99
4.1	Introduction	100
4.2	Background	101
4.2.1	Commodity index funds and index trading	102
4.2.2	Few-type heterogeneous agent models for financial markets	103
4.3	Commodity market HAM	105
4.3.1	The base scenario	105
4.3.2	The financialization scenario	107
4.4	Base scenario parameter estimation	109
4.4.1	Selection and calculation of moments	109
4.4.2	Objective function	111
4.4.3	Parameter estimation	113
4.4.4	Evaluation of the model fit	115
4.5	Scenario comparison	119
4.5.1	Base scenario results	119
4.5.2	Financialization scenario results	122
4.6	Conclusions	128
4.7	References	130
4.8	Annex	134
