# TABLE OF CONTENTS

## INTRODUCTION

1 Dietary assessment in large-scale epidemiological studies 3
   1.1 The concept of usual dietary intake 3
      1.1.1 General considerations 3
      1.1.2 Trends over time of dietary assessment in large-scale epidemiological studies 4
   1.2 Dietary assessment methods 6
      1.2.1 The 24-hour dietary recall method 7
      1.2.2 The food frequency method 8
      1.2.3 Innovative technologies for dietary assessment 10
      1.2.4 Combined approaches for the estimation of usual dietary intake 11

2 Objectives 13

## SUBJECTS AND METHODS

1 Study design 14
   1.1 German National Nutrition Survey II 14
   1.2 Pilot study Diet of the German National Cohort 14
2 Analytical approaches 16
   2.1 Development of the 24-hour food list (Objective 1) 16
      2.1.1 Study population 16
      2.1.2 Statistical analysis 16
   2.2 Determinants of consumption-day amounts (Objective 2) 19
      2.2.1 Study population 19
### Table of Contents

#### 2.2.2 Variable assessment for use in analysis 20

#### 2.3 Feasibility and evaluation study of the 24-hour food list (Objective 3)

- 2.3.1 Study population 22
- 2.3.2 Variable assessment for use in analysis 22
- 2.3.3 Statistical analysis 23

#### 2.4 An application example for the estimation of usual dietary intake (Objective 4)

- 2.4.1 Study population 25
- 2.4.2 Variable assessment for use in analysis 25
- 2.4.3 Statistical analysis 25

#### III RESULTS

1 The item list and design of the 24-hour food list (Objective 1) 27

2 Determinants of consumption-day amounts (Objective 2) 34

3 Feasibility and evaluation study of the 24-hour food list (Objective 3) 42

4 An application example for the estimation of usual dietary intake (Objective 4) 48

#### IV DISCUSSION

1 Results in the context of the current literature 60

- 1.1 General aspects 60
- 1.2 The 24-hour food list 63
- 1.3 Standard consumption-day amounts 67

2 Strengths and limitations 71

- 2.1 General aspects 71
- 2.2 The 24-hour food list 73
- 2.3 Standard consumption-day amounts 74

3 Implications for future directions in dietary assessment 76
