# Table of contents

1 **Introduction**  
1.1 The physiological states of lactation in high-yielding dairy cows  
1.1.1 Metabolic and oxidative status in over-conditioned dairy cows  
1.1.2 The importance of adipose tissue in dairy cows  
1.1.3 Adipose tissue angiogenesis  
1.2 Cellular energy-supply in metabolism of dairy cows  
1.2.1 The role of mitochondria in cellular metabolism  
1.2.2 Mitochondrial DNA copy number  
1.2.3 Regulators of mitochondrial biogenesis  
1.2.4 Mitochondria in dairy cattle  
1.3 Processes of cellular aging  
1.3.1 Telomeres and the end-replication problem  
1.3.2 Telomere length in dairy cattle  
2 **Objectives**  
3 **Manuscript I (submitted)**: The impact of oxidative stress on adipose tissue angiogenesis and mitochondrial biogenesis in over-conditioned dairy cows  
4 **Manuscript II (submitted)**: Mitochondrial number and biogenesis in different tissues of early and late lactating dairy cows  
5 **Manuscript III (submitted)**: Telomere lengths in different tissues during early and late lactation in dairy cows  
6 **General discussion and conclusions**  
7 **Summary**  
8 **Zusammenfassung**  
9 **References**  
10 **Danksagung**  
11 **Publications and proceedings derived from this doctorate thesis**
