## Publications

List of Tables  
List of Figures  
List of Abbreviations

## 1. Introduction

## 2. Background

2.1. Definition of overweight and obesity  
2.2. Obesity and body fat distribution  
2.3. Overweight, obesity and their association to chronic diseases  
2.4. Causes of obesity  
2.5. Metabolomics  
2.5.1. Untargeted metabolomics  
2.5.2. Targeted metabolomics  
2.5.3. Opportunities of metabolomics in obesity research

## 2.6. Objectives

## 3. Subjects and Methods

3.1. Study design  
3.1.1. European Prospective Investigation into Cancer and Nutrition Study  
3.1.2. Cooperative Health Research Platform in the Region Augsburg Study  
3.1.3. National health interview and examination survey

3.2. Study population

3.3. Tendencies to a specific body fat distribution in weight-gaining individuals in Germany (objective 1)  
3.3.1. Study population  
3.3.1. Variable assessment at baseline  
3.3.2. Statistical analysis

3.4. Identification of phenotype associated metabolites (objective 2)  
3.4.1. Study population  
3.4.2. Blood sample collection  
3.4.3. Sample preparation and metabolomics measurement  
3.4.4. Statistical analysis

3.5. Comparison of results from two approaches (objective 3)  
3.5.1. Study population  
3.5.2. Statistical analysis
# Table of Contents

## 4. Results

4.1. Characteristics of the analytical study populations of EPIC-Potsdam, KORA and DEGS 37

4.2. Tendencies to a specific body fat distribution in weight-gaining individuals (objective 1) 40

- 4.2.1. General tendencies 40
- 4.2.2. Waist-hip difference in association to established anthropometric markers 43

4.3. Identification of phenotype associated metabolites (objective 2) 45

- 4.3.1. Main results of the meta-analytical approach 46
- 4.3.2. Women 47
- 4.3.3. Men 48
- 4.3.4. Sensitivity and subgroup analyses 50
- 4.3.5. Correlations between metabolites and anthropometric measures 73

4.4. Comparing the results of two different approaches (objective 3) 75

- 4.4.1. Single metabolites and their association to WG and HG phenotypes in EPIC-Potsdam 78
- 4.4.2. Principal components and their association to WG and HG phenotypes in EPIC-Potsdam 81
- 4.4.3. Comparison of results 83

## 5. Discussion

5.1. Discussion of the methods 85

5.2. Discussion of the results 89

5.3. Strength and limitations 97

5.4. Conclusion and future prospects 100
