<b>Abstract</b>	<b>3</b>
<b>List of Publications</b>	<b>5</b>
<b>Contents</b>	<b>7</b>
<b>List of Figures</b>	<b>11</b>
<b>List of Tables</b>	<b>15</b>
<b>1. Introduction</b>	<b>17</b>
1.1. Late stages of stellar evolution . . . . .	17
1.1.1. Main sequence stars . . . . .	17
1.1.2. Post-main sequence evolution of low- and intermediate-mass stars . . . . .	17
1.1.3. Post-main sequence evolution of massive stars . . . . .	19
1.2. Circumstellar envelope . . . . .	20
1.2.1. Extended atmosphere . . . . .	20
1.2.2. Wind acceleration . . . . .	21
1.2.3. Outer circumstellar envelope . . . . .	22
1.3. Outline of the thesis . . . . .	24
<b>2. Multi-wavelength observations of circumstellar ammonia in oxygen-rich evolved stars</b>	<b>25</b>
2.1. Introduction . . . . .	25
2.1.1. A ubiquitous molecule . . . . .	25
2.1.2. Circumstellar ammonia . . . . .	26
2.1.3. An enigma in circumstellar chemistry . . . . .	26
2.1.4. Previous modelling . . . . .	26
2.1.5. Molecular physics of ammonia . . . . .	27
2.2. Observations and data reduction . . . . .	30
2.2.1. Target selection . . . . .	30
2.2.2. <i>Herschel</i> Space Observatory . . . . .	30
2.2.3. IRAM 30-metre Telescope . . . . .	31
2.2.4. NASA Infrared Telescope Facility (IRTF) . . . . .	32

## CONTENTS

2.2.5.	Karl G. Jansky Very Large Array (VLA)	33
2.3.	Radiative transfer modelling	37
2.3.1.	Molecular data of ammonia	38
2.3.2.	Dust continuum emission	38
2.4.	Results and discussion	39
2.4.1.	IK Tau	39
2.4.2.	VY CMa	48
2.4.3.	OH 231.8+4.2	56
2.4.4.	IRC +10420	60
2.4.5.	Ammonia chemistry	67
2.5.	Speculated origins of circumstellar ammonia	72
2.5.1.	Pulsation-driven shocks	72
2.5.2.	Deep ultraviolet photodissociation	73
2.5.3.	Enhanced nitrogen production	73
<b>3.</b>	<b>The ALMA view of the extended atmosphere and inner wind of Mira</b>	<b>75</b>
3.1.	Introduction	75
3.1.1.	Mira Ceti	75
3.1.2.	Previous observations of the extended atmosphere	76
3.1.3.	Motivation of ALMA observations	76
3.2.	Observations and data processing	77
3.2.1.	Atacama Large Millimeter/submillimeter Array (ALMA)	77
3.2.2.	The 2014 ALMA Long Baseline Campaign	77
3.2.3.	Observations of Mira AB	77
3.2.4.	Data calibration	78
3.2.5.	Continuum positions of Mira A	80
3.2.6.	Continuum subtraction	80
3.2.7.	Image reconstruction	81
3.2.8.	Primary beam	81
3.2.9.	Channel maps	81
3.3.	Results	83
3.3.1.	Continuum analysis	83
3.3.2.	Images	92
3.3.3.	Spectra	93
3.4.	Radiative transfer modelling	101
3.4.1.	H <sub>2</sub> O molecular data	101
3.4.2.	SiO molecular data	102
3.4.3.	Continuum emission	102
3.4.4.	Modelling results	102

3.5. Discussion . . . . .	113
3.5.1. Caveat in the interpretation of the gas density . . . . .	113
3.5.2. Structure of the extended atmospheres . . . . .	114
3.5.3. Comparison with current hydrodynamic models . . . . .	119
<b>4. Summary and outlook</b>	<b>131</b>
4.1. The ammonia enigma . . . . .	131
4.1.1. Conclusions . . . . .	131
4.1.2. Prospects . . . . .	132
4.2. Extended atmospheres of evolved stars . . . . .	133
4.2.1. Conclusions . . . . .	133
4.2.2. Prospects . . . . .	133
