

## TABLE OF CONTENTS

<b>PREFACE</b> .....	<b>11</b>
<b>ABSTRACT</b> .....	<b>13</b>
<b>ZUSAMMENFASSUNG</b> .....	<b>15</b>
<b>GENERAL ACKNOWLEDGEMENTS</b> .....	<b>17</b>
<b>CHAPTER I: Gastroliths – An overview</b> .....	<b>19</b>
<b>References</b> .....	<b>21</b>
<b>CHAPTER II: A review of gastrolith function and a revised classification</b> .....	<b>23</b>
<b>Abstract</b> .....	<b>23</b>
<b>Introduction</b> .....	<b>23</b>
<b>Terminology</b> .....	<b>24</b>
Existing definitions for gastrolith .....	24
Suggested new definition for gastrolith .....	25
Categories of gastrolith regarding their origin .....	26
Introduction of the term “exolith” .....	27
Definition of geophagy and lithophagy .....	29
<b>Gastrolith function</b> .....	<b>30</b>
Trituration of ingesta .....	30
Mixing of foodstuff .....	31
Mineral supply .....	32
Secretion of stomach juices .....	33
Mineral storage .....	33
Hydrostatic function .....	34
Other ballast arguments .....	36
Ingestion due to pathological reasons .....	37
Nutritional diseases .....	37
Destruction of parasites .....	37
Establishment of a normal intestinal microbial flora .....	38
Alleviation of hunger and preservation of stomach shape .....	38
Accidental ingestion .....	39
Stones mistaken as prey .....	40
Playing .....	40
Nest building .....	41
Thermoregulation .....	41
Memorial of events .....	42
Admiration of semi-precious gemstones .....	42

<b>Conclusions .....</b>	<b>43</b>
<b>Acknowledgements .....</b>	<b>43</b>
<b>References .....</b>	<b>44</b>
<b>Tables.....</b>	<b>50</b>
<b>CHAPTER III: Amounts and composition of gastroliths in farm ostriches (<i>Struthio camelus</i>) .....</b>	<b>51</b>
<b>Abstract .....</b>	<b>51</b>
<b>Introduction .....</b>	<b>51</b>
Anatomy and physiology of the digestive tract .....	52
Diet and digestion.....	52
<b>Existing data about gastroliths in ratites .....</b>	<b>53</b>
<b>Material and Methods.....</b>	<b>54</b>
<b>Results.....</b>	<b>56</b>
Ostriches from Remagen, Germany .....	56
Rock type composition .....	57
Grain size distribution and number of gastroliths.....	58
Ostriches from the Klein Karoo, South Africa .....	58
<b>Discussion and Conclusions .....</b>	<b>59</b>
Occurrence of gastroliths.....	59
Amounts of gastroliths.....	59
Rock type composition .....	61
Grain size composition .....	61
Foreign objects .....	62
Usability of the data as reference values .....	63
<b>Acknowledgements .....</b>	<b>63</b>
<b>References .....</b>	<b>64</b>
<b>Tables.....</b>	<b>66</b>
<b>Figures .....</b>	<b>69</b>
<b>CHAPTER IV: Observations on the release of gastroliths from ostrich chick carcasses in terrestrial and aquatic environments .....</b>	<b>75</b>
<b>Abstract .....</b>	<b>75</b>
<b>Introduction .....</b>	<b>75</b>
<b>Experimental setting .....</b>	<b>75</b>
<b>Observations .....</b>	<b>76</b>

<b>Discussion</b> .....	<b>77</b>
<i>Experiment in terrestrial environment</i> .....	77
<i>Experiment in aquatic environment</i> .....	77
<i>General discussion</i> .....	78
<b>Conclusions</b> .....	<b>78</b>
<b>Acknowledgements</b> .....	<b>79</b>
<b>References</b> .....	<b>79</b>
<b>Figures</b> .....	<b>81</b>
<b>CHAPTER V: Review of the taphonomy of gastrolith-bearing vertebrates and a new classification for gastrolith finds</b> .....	<b>83</b>
<b>Abstract</b> .....	<b>83</b>
<b>Introduction</b> .....	<b>83</b>
Authentic gastrolith deposits without associated bones .....	84
Non-gastrolith deposits of exotic rocks .....	85
<b>Transport mechanisms of clasts</b> .....	<b>85</b>
<b>Separation mechanisms for gastroliths and bones</b> .....	<b>86</b>
Separation during lifetime .....	86
Regurgitation .....	86
Defecation .....	86
Post-mortem separation .....	87
Predation, scavenging, and reuse .....	87
Destruction of bones or stones by weathering and diagenesis .....	89
Aquatic transport .....	89
Marine transport .....	89
Fluvial transport of bones and gastroliths .....	90
<b>Post-mortem accumulation with bones</b> .....	<b>92</b>
<b>Taphonomic evidence from gastrolith-bearing fossil taxa</b> .....	<b>93</b>
Tangasaurids and other reptiles from Madagascar .....	93
Extant and fossil crocodylians .....	94
Plesiosauria .....	95
Sauropodomorph dinosaurs .....	96
Theropod dinosaurs .....	97
Fossil birds with focus on ratites .....	98
<b>Discussion and Conclusions</b> .....	<b>100</b>
Classification of gastrolith finds .....	100
Occurrence pattern of gastroliths within the fossil record .....	101
Completeness of skeletal remains .....	102
The influence of the depositional environment .....	103
<b>Acknowledgements</b> .....	<b>103</b>

<b>References .....</b>	<b>104</b>
<b>Tables.....</b>	<b>112</b>
<b>Figures .....</b>	<b>114</b>
<b>CHAPTER VI: Are gastroliths scarce in sauropod dinosaurs? Paleobiological, taphonomical, and sedimentological evidence from field work in Upper Jurassic dinosaur localities.....</b>	<b>121</b>
<b>Abstract .....</b>	<b>121</b>
<b>Introduction .....</b>	<b>121</b>
<b>Methods .....</b>	<b>122</b>
Carnegie Quarry, Dinosaur National Monument (DNM) .....	123
Cleveland-Lloyd-Dinosaur-Quarry (CLDQ).....	124
Como Bluff and Bone Cabin Quarry .....	125
Dry Mesa Dinosaur Quarry (DMDQ) .....	126
Howe Quarry .....	128
Howe Stephens Quarry.....	129
Additional sites .....	129
<i>Cedarosaurus</i> site .....	129
<i>Seismosaurus</i> site.....	130
Lourinhã, Portugal .....	131
Chubut, Argentina.....	131
Tendaguru, Tanzania .....	131
<b>Interpretation and Discussion .....</b>	<b>132</b>
1) Material not recognized, recorded, nor collected.....	132
2) Loss under stress or during death.....	134
3a) Postmortem removal by scavengers .....	134
3b) Postmortem removal by sedimentological processes.....	134
3c) Postmortem removal by diagenetic processes.....	135
3d) Postmortem removal by other sauropods .....	135
True absence of gastroliths .....	136
<b>Conclusions .....</b>	<b>137</b>
<b>Acknowledgements.....</b>	<b>137</b>
<b>References .....</b>	<b>137</b>
<b>Tables.....</b>	<b>141</b>
<b>Figures .....</b>	<b>142</b>
<b>CHAPTER VII: A simulated bird gastric mill and its implications for fossil gastrolith authenticity .....</b>	<b>149</b>
<b>Abstract .....</b>	<b>149</b>

<b>Introduction .....</b>	<b>149</b>
<b>Material and Methods.....</b>	<b>150</b>
<b>Results.....</b>	<b>152</b>
<b>Discussion and Conclusions .....</b>	<b>152</b>
<b>Acknowledgements.....</b>	<b>154</b>
<b>References .....</b>	<b>154</b>
<b>Figures .....</b>	<b>155</b>
<b>CHAPTER VIII: Suggested future research on gastroliths.....</b>	<b>161</b>
<b>Crocodylian gastroliths.....</b>	<b>161</b>
<b>Pinniped gastroliths.....</b>	<b>162</b>
<b>Permian vertebrates .....</b>	<b>162</b>
<b>Insectivorous species .....</b>	<b>163</b>
<i><b>Psittacosaurus and Caudipteryx .....</b></i>	<b>163</b>
<b>Taphonomy studies.....</b>	<b>163</b>
<b>References .....</b>	<b>163</b>
<b>APPENDIX I: Compilation of records of gastroliths in non-avian dinosaurs .....</b>	<b>165</b>
<b>APPENDIX II: Compilation of records of gastroliths in extant bird species.....</b>	<b>169</b>
<b>APPENDIX III: Raw data of ostrich examination.....</b>	<b>179</b>
